

Echo Water Cleaning Kit Instructions

- Disconnect the water hose from the “Acidic Water Outlet” on back of the machine.
- Insert the provided hose with valve in off position, into the “Acidic Water Outlet” on the back of the machine.
- Open vinegar bottle and insert the squeeze nozzle and tighten bottle.
- Simply squeeze 50 mL of vinegar into your main water source tube.
- Let the vinegar sit at least 3 hours. For best results let sit overnight.
- Turn on unit and flush. Water should only be coming out from the nozzle with the restrictor in the off position on the acidic line.
- Flush unit until water is clear.
- Turn the restrictor to the on position and taste your water.

You should now have most if not all calcium from your lines.
